

Built Faster. Built Smarter. [Built With Klover.](#)

# Award Winning Solutions Built for the AI Infrastructure Era

As AI infrastructure rapidly expands, developers and contractors are under increasing pressure to build faster, smarter, safer, and more efficiently than ever before.

Award-winning Klover Contracting Inc. partners with clients to solve complex construction challenges through innovative prefabricated solutions engineered specifically for the demands of modern data center environments. Proud recipient of the **2025 National Excellence in Construction® Eagle Award**, Klover brings proven expertise, precision, and execution to mission critical projects.

From exterior wall systems and interior framing packages to eHouse structures, custom prefabricated assemblies, and specialized support buildings, Klover helps turn complex project demands into scalable construction solutions.

**Schedule Acceleration Partner™**

Built Faster. Built Smarter. [Built With Klover.](#)

# Build Smarter. Build Faster. Build Different.

Whether the challenge is speed, scale, labor, or complexity, Klover delivers creative prefabricated solutions built around your project needs.

## MORE THAN A PRODUCT PROVIDER

# We Help Create Solutions Where They Didn't Exist Before

As AI infrastructure rapidly expands, developers and contractors are under increasing pressure to build faster, smarter, safer, and more efficiently than ever before.

At Klover Inc., we partner with clients to solve complex construction challenges through **innovative prefabricated solutions engineered specifically for the demands of modern data center environments.**

From exterior wall systems and interior framing packages to eHouse structures, custom prefabricated assemblies, and specialized support buildings, Klover helps turn complex project demands into scalable construction solutions.

## NEXT GENERATION PREFAB CONSTRUCTION

# Innovation Through Prefabrication

The next generation of data center construction requires more than traditional building methods.

It requires partners willing to rethink how projects are designed, manufactured, delivered, and installed.

Klover works closely with project teams to identify opportunities where prefabrication can:

- Reduce schedule pressure
- Improve constructability
- Eliminate bottlenecks
- Simplify field installation
- Improve quality control
- Reduce labor exposure
- Create repeatable scalable systems

Our role is not simply to manufacture components. **Our role is to help solve construction challenges before they become project delays.**

## SOLUTIONS INCLUDE:

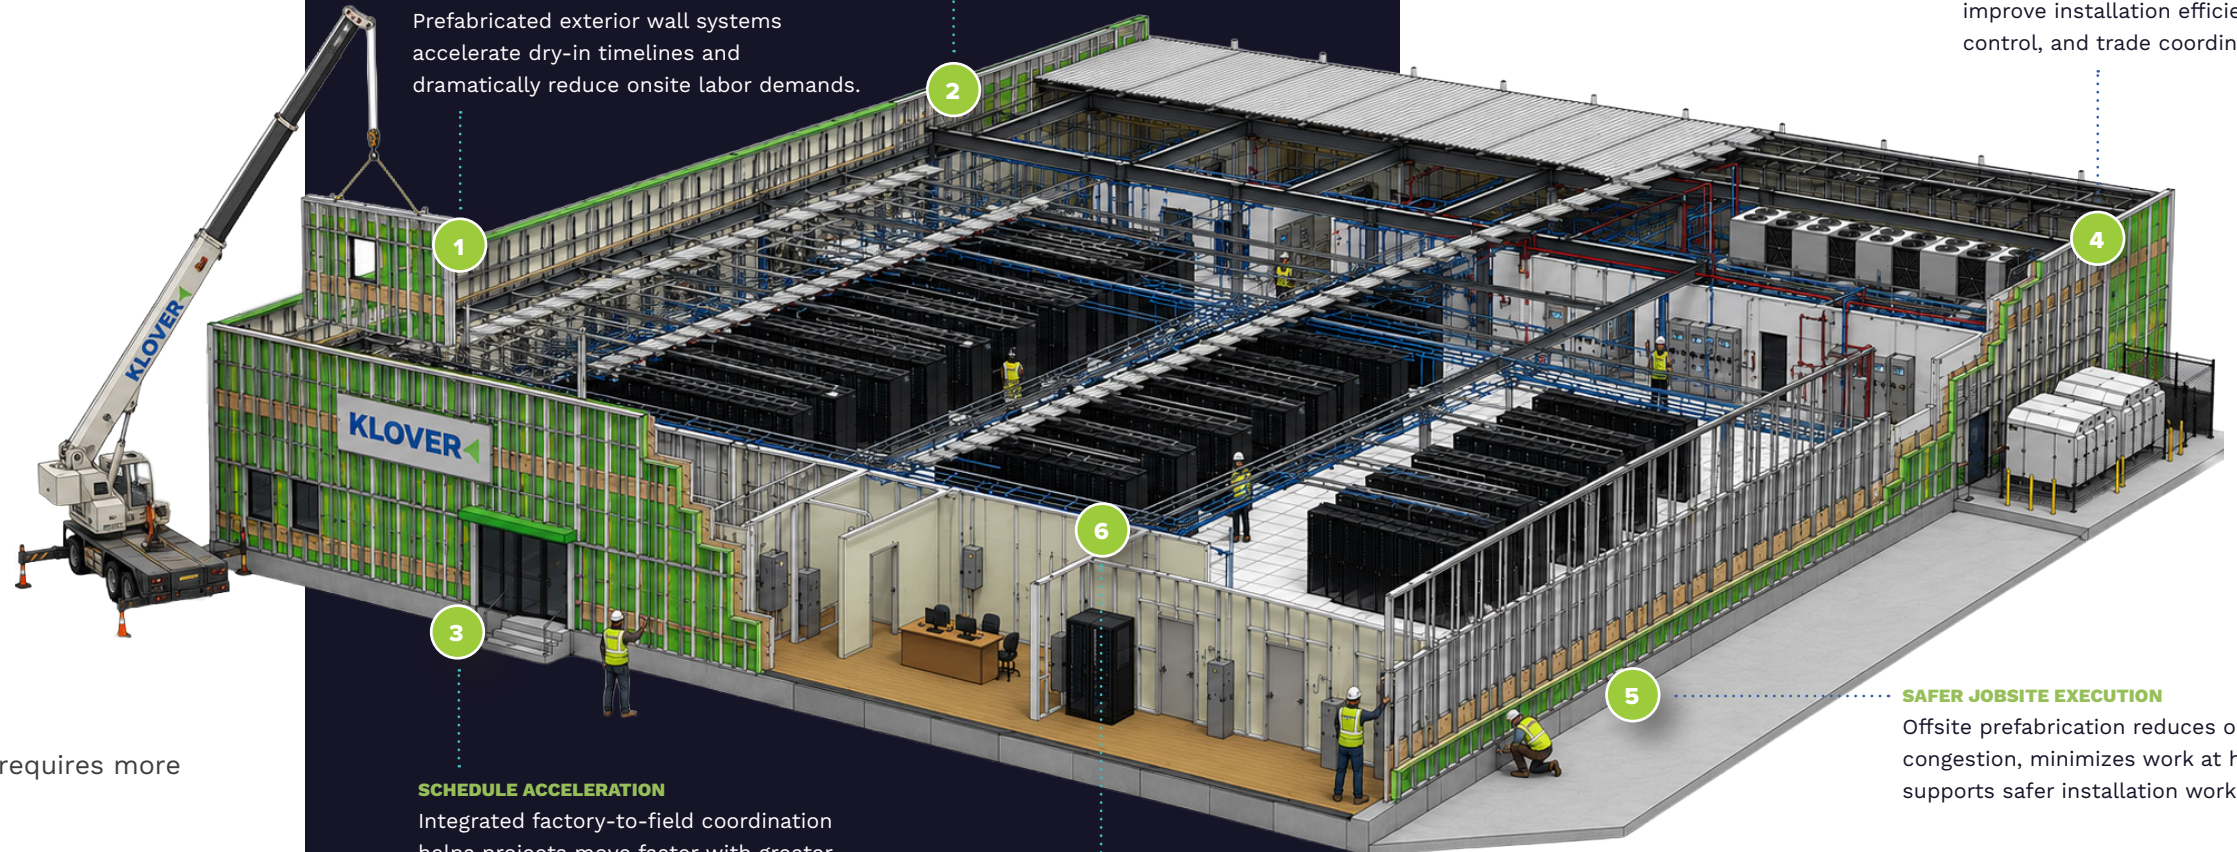

# Custom Prefabricated Solutions For Data Center Environments

### CUSTOM PREFABRICATED SOLUTIONS

Klover develops creative prefabricated systems tailored to the unique challenges of modern data center construction.

### RAPID EXTERIOR INSTALLATION

Prefabricated exterior wall systems accelerate dry-in timelines and dramatically reduce onsite labor demands.

3

5

### SCHEDULE ACCELERATION

Integrated factory-to-field coordination helps projects move faster with greater schedule certainty and fewer delays.

### SAFER JOBSITE EXECUTION

Offsite prefabrication reduces onsite congestion, minimizes work at height, and supports safer installation workflows.

### MISSION CRITICAL INFRASTRUCTURE

From eHouse opportunities to specialized support structures, Klover helps solve complex infrastructure challenges at scale.

7

### STRUCTURAL STEEL INTEGRATION

Klover's integrated steel framing solutions provide enhanced structural support and installation precision for demanding environments.

## KLOVER DIFFERENTIATORS:

- Exterior Wall Systems
- Interior Wall & Framing Systems
- eHouse Structures
- Guardhouses & Support Buildings
- Load-Bearing Assemblies
- Custom Framing Packages
- Shaft Wall Systems
- Structural Tube Steel Integration
- Vapor Barriers
- Specialized Prefabricated Components

## EVERY SOLUTION DESIGN TO IMPROVE:

- Speed to enclosure
- Installation efficiency
- Schedule certainty
- Coordination across trades
- Jobsite safety
- Material optimization
- Long-term scalability

### INTERIOR FRAMING SYSTEMS

Precision-built interior wall assemblies improve installation efficiency, quality control, and trade coordination.

**Klover combines award-winning expertise, creative prefabricated solutions, and proven execution to help data center projects move faster with greater certainty. From wall systems to custom infrastructure assemblies, we help solve complex construction challenges before they become project delays. When speed, scalability, safety, and innovation matter, Klover delivers.**
