

Built Faster. Built Smarter. [Built With Klover.](#)

Award Winning Creative Prefabricated Solutions for Modern E-House Construction

As power and mission-critical infrastructure demands continue to accelerate, **developers, utilities, contractors, and infrastructure teams are under increasing pressure to deploy faster, smarter, safer, and more efficiently than ever before.**

Award-winning Klover partners with clients to **solve complex infrastructure challenges through innovative prefabricated solutions engineered specifically for the demands of modern e-house and modular infrastructure environments.** Proud recipient of the 2025 National Excellence in Construction® Eagle Award, Klover brings proven expertise, precision, and execution to mission-critical projects.

From prefabricated wall systems and integrated framing assemblies to modular e-house structures, transport-ready infrastructure systems, and specialized support buildings, Klover helps transform complex infrastructure demands into scalable construction solutions.

Schedule Acceleration Partner™

Built Faster. Built Smarter. [Built With Klover.](#)

Build Smarter. Build Faster. Build Different.

Whether the challenge is speed, deployment logistics, labor, or complexity, Klover delivers creative prefabricated solutions built around your project needs.

MORE THAN A PRODUCT PROVIDER

We Help Create Solutions Where They Didn't Exist Before

As mission-critical infrastructure demands continue to grow, developers and contractors are under increasing pressure to deploy systems faster, safer, and more efficiently than ever before.

At Klover Inc., we partner with clients to solve complex infrastructure challenges through **innovative prefabricated solutions engineered specifically for the demands of modern modular e-house construction.**

From prefabricated wall systems and integrated framing assemblies to transportable e-house structures and custom infrastructure modules, Klover helps transform complex project demands into scalable deployment solutions.

NEXT GENERATION PREFAB CONSTRUCTION

E-House Innovation Through Prefabrication

The next generation of data center construction requires more than traditional building methods.

It requires partners willing to rethink how projects are designed, manufactured, delivered, and installed.

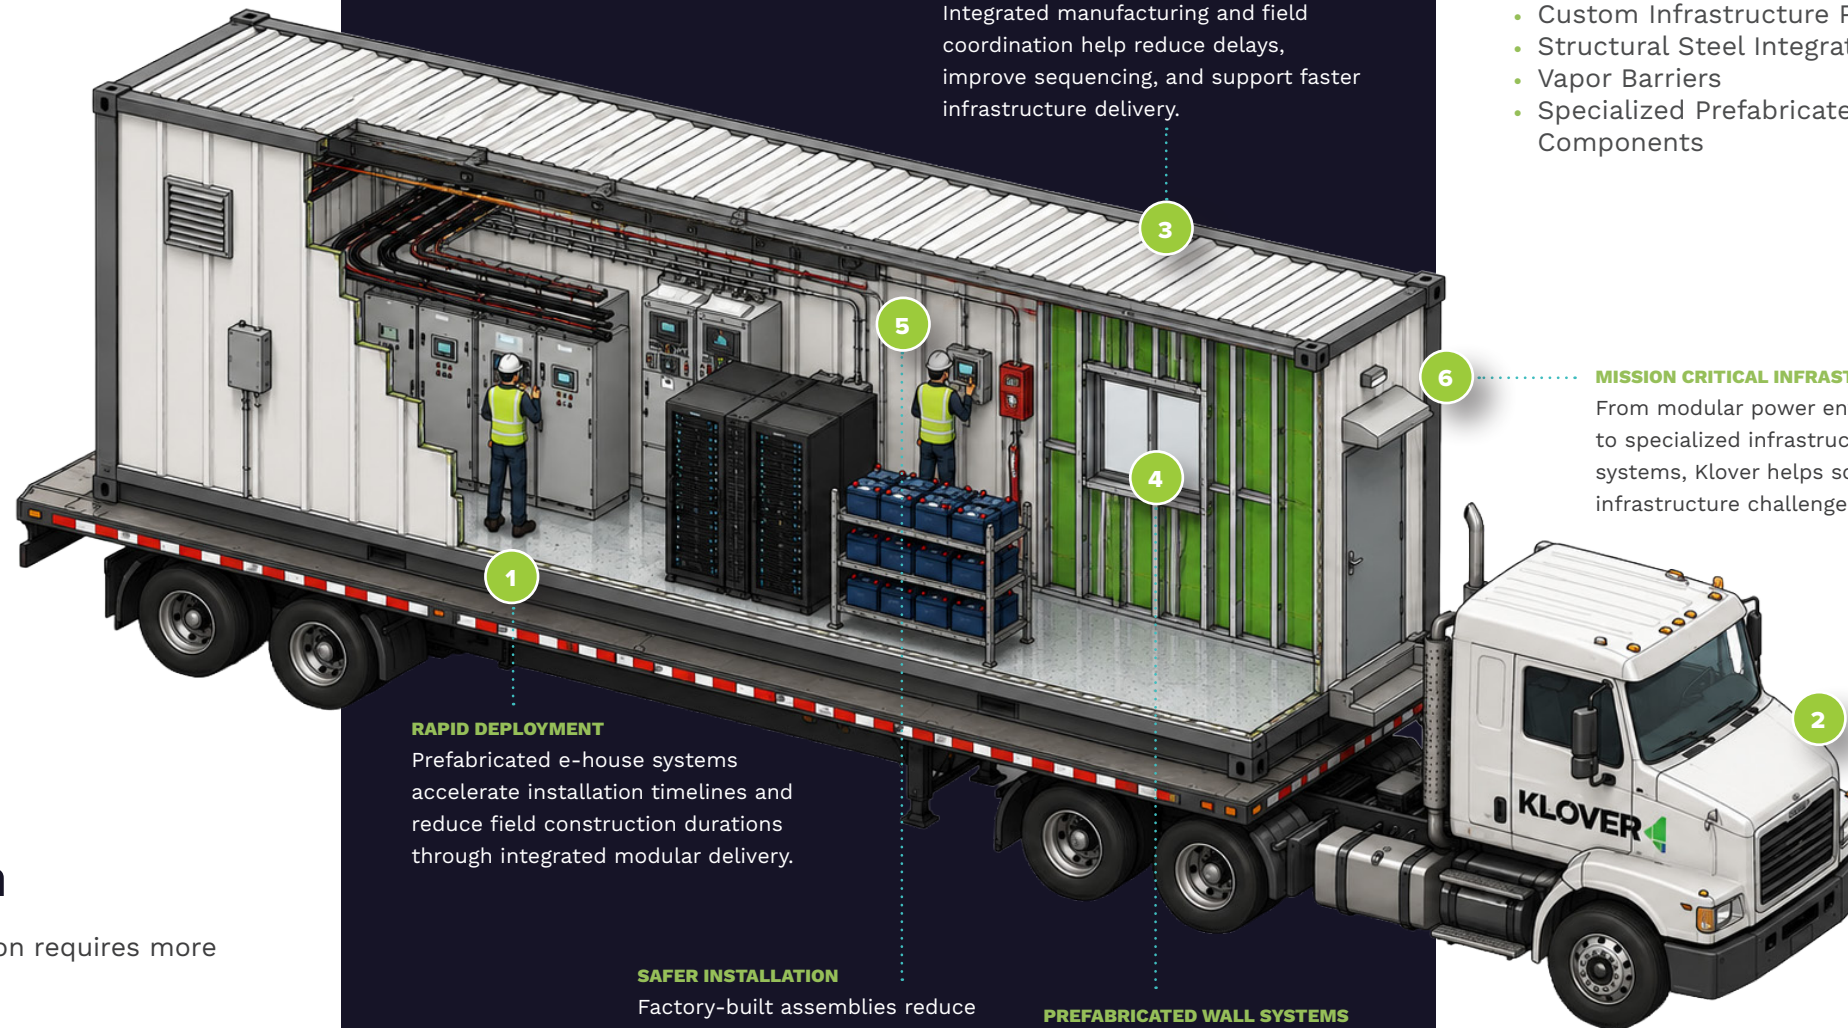

Klover works closely with project teams to identify opportunities where prefabrication can:

- Reduce deployment timelines
- Improve constructability
- Simplify transportation logistics
- Eliminate field bottlenecks
- Improve installation efficiency
- Reduce labor exposure
- Improve quality control
- Create scalable repeatable systems

Our role is not simply to manufacture components.
Our role is to help solve construction challenges before they become project delays.

SOLUTIONS INCLUDE:

Custom Prefabricated Solutions For E-House Infrastructure

SCHEDULE CERTAINTY

Integrated manufacturing and field coordination help reduce delays, improve sequencing, and support faster infrastructure delivery.

RAPID DEPLOYMENT

Prefabricated e-house systems accelerate installation timelines and reduce field construction durations through integrated modular delivery.

SAFER INSTALLATION

Factory-built assemblies reduce onsite congestion, minimize field labor demands, and support safer installation workflows.

PREFABRICATED WALL SYSTEMS

Klover's prefabricated wall assemblies improve structural coordination, installation efficiency, and long-term infrastructure performance.

STRUCTURAL STEEL INTEGRATION

Klover's integrated steel framing solutions provide enhanced structural support and installation precision for demanding environments.

KLOVER DIFFERENTIATORS:

- Prefabricated Wall Systems
- Integrated Framing Assemblies
- E-House Structures
- Transportable Infrastructure Modules
- Support Buildings
- Custom Infrastructure Packages
- Structural Steel Integration
- Vapor Barriers
- Specialized Prefabricated Components

EVERY SOLUTION DESIGN TO IMPROVE:

- Deployment speed
- Installation efficiency
- Schedule certainty
- Coordination across trades
- Jobsite safety
- Transportation logistics
- Material optimization
- Long-term scalability

MISSION CRITICAL INFRASTRUCTURE

From modular power environments to specialized infrastructure systems, Klover helps solve complex infrastructure challenges at scale.

RAPID DEPLOYMENT

Prefabricated e-house systems accelerate installation timelines and reduce field construction durations through integrated modular delivery.

KLOVER

Klover combines award-winning expertise, creative prefabricated solutions, and proven execution to help infrastructure projects deploy faster with greater certainty. From prefabricated wall systems to transportable modular assemblies, we help solve complex construction challenges before they become project delays. When speed, scalability, safety, and innovation matter, Klover delivers.
